The TIMSS & PIRLS International Study Center at Boston College

The TIMSS & PIRLS International Study Center (ISC) at Boston College is dedicated to conducting comparative studies in educational achievement. Principally, it serves as the International Study Center for IEA's studies in mathematics, science, and reading – the Trends in International Mathematics and Science Study (TIMSS), and the Progress in International Reading Literacy Study (PIRLS). The staff at the TIMSS & PIRLS ISC is responsible for the design and implementation of these studies. In developing and producing the TIMSS frameworks, ISC staff conducted a collaborative effort involving a series of iterative reviews by the TIMSS 2007 Science and Mathematics Item Review Committee and the National Research Coordinators. The following individuals were instrumental in this process.

Ina V.S. Mullis
Co-Director, TIMSS

Michael O. Martin
Co-Director, TIMSS

Pierre Foy
Director, Sampling and Data Analysis

Graham J. Ruddock
Mathematics Coordinator

Christine Y. O'Sullivan
Science Coordinator

Alka Arora
Research Associate

Ebru Erberber
Research Associate

Eugene Johnson
Psychometric/Methodology
Consultant

International Association for the Evaluation of Educational Achievement (IEA)

In developing the TIMSS Assessment Frameworks and Specifications, the IEA has provided overall support in coordinating TIMSS with IEA's member countries and reviewing all elements of the design. The following persons are closely involved with TIMSS.

Hans Wagemaker
Executive Director

Barbara Malak
Manager, Membership Relations

Juriaan Hartenberg
Financial Manager

Dirk Hastedt
IEA Data Processing Center

Oliver Neuschmidt
IEA Data Processing Center

Juliane Barth
IEA Data Processing Center

Funding Agencies

Support for developing the TIMSS 2007 frameworks came from a number of sources, including the participating countries, the National Center for Education Statistics of the US Department of Education, the US National Science Foundation, the World Bank, the United Nations Development Programme, Boston College, and the National Foundation for Educational Research in England and Wales.

Statistics Canada

Statistics Canada is responsible for sampling activities in TIMSS, including collecting and evaluating the sampling documentation in TIMSS, helping participants to adapt the TIMSS sampling design to

local conditions, and drawing the school samples for most of the participating countries. Senior methodologist Marc Joncas reviewed the frameworks from a sampling perspective and made many helpful suggestions.

Educational Testing Service

Educational Testing Service assists the scaling of the TIMSS achievement data. Researcher Matthias Von Davier reviewed the frameworks from a design perspective.

Science and Mathematics Item Review Committee

Science and Mathematics Item Review Committee (SMIRC) worked with staff from the International Study Center in developing all aspects of the frameworks and particularly the mathematics and science frameworks. They made recommendations for the content and cognitive domains, and focus areas for policy-orientated research.

National Research Coordinators

The TIMSS National Research Coordinators (NRCs) work with international project staff to ensure that the study is responsive to their concerns, both policy-oriented and practical, and are responsible for implementing the study in their countries. NRCs reviewed successive drafts of the frameworks, and made numerous suggestions that greatly benefited the final document.
